PROFESSIONAL SUMMARY

Passionate Python Developer and Computer Science undergraduate with a strong foundation in Python, Java, Data Structures and Algorithms, SQL, DBMS, and web development. Experienced in designing, developing, and deploying applications using Python, Flask, SQL, HTML, CSS, and JavaScript. Hands-on experience in backend development, CRUD operations, database integration, responsive web application development, image processing, and deep learning. Strong problem-solving skills with an interest in backend engineering, software development, and AI-driven solutions. Seeking an entry-level Python Developer or Software Developer position to apply technical skills and contribute to real-world applications.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, React.js, Node.js, Express.js, NumPy, Pandas, Matplotlib

Databases: MySQL, SQLite, SQL, DBMS

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST APIs, CRUD Operations, Computer Networks

Tools & Technologies: Git, GitHub, VS Code, Render, GitHub Pages

Data Science & AI: Data Preprocessing, Exploratory Data Analysis (EDA), Image Processing, Deep Learning Fundamentals, Machine Learning Fundamentals

KEY PROJECTS

Job Application Management System

Python, Flask, SQLite, HTML, CSS

- Developed a web-based application to organize and manage job applications through a centralized and user-friendly interface.
- Implemented CRUD operations to add, view, search, filter, and delete job application records using SQLite database storage.
- Built the backend using Flask and integrated HTML/CSS templates to create a responsive web application.
- Added application status tracking for Applied, Interview, Selected, and Rejected applications with a dashboard-based overview.
- Deployed the project using GitHub and Render.

Smart Expense Tracker

HTML, CSS, JavaScript

- Developed a responsive web application for recording, categorizing, and managing daily income and expenses.
- Implemented automatic calculation of total income, total expenses, and remaining balance for financial tracking.
- Added dark and light mode functionality to improve usability and provide a personalized user experience.
- Designed a clean and responsive interface using HTML and CSS with JavaScript-based functionality.
- Deployed the project using GitHub Pages.

Detection of Sickle Cell Anemia from Microscopic Images

Python, Image Processing, Deep Learning

- Developed a Python-based application for analyzing microscopic blood smear images to detect and classify sickle cell anemia.
- Applied image preprocessing and image processing techniques to extract relevant visual features from microscopic cell images.
- Utilized an EfficientNet-B0 based deep learning approach for classifying normal and sickle-shaped red blood cells.
- Evaluated the classification performance using standard evaluation metrics.

Image-Driven Classification of Oilseeds & Nuts using Deep Learning & Image Processing

Python,

Deep Learning, Image Processing

- Developed a Python-based image classification application for identifying different types of nuts and oilseeds from images.
- Applied image preprocessing and feature extraction techniques to improve image quality and classification performance.
- Utilized deep learning techniques for automated image-based classification of oilseeds and nuts.
- Conducted testing and comparative analysis of different approaches to evaluate classification performance.

EDUCATION

Sambalpur University Institute of Information Technology (SUIT)

2022 – 2026

Bachelor of Technology (B.Tech) in Computer Science and Engineering

CGPA: 9.076/10

Banki Higher Secondary School, Banki

2022

Higher Secondary Education (Class XII)

Percentage: 75.3%

Vivekananda Public School, Bhubaneswar

2020

Secondary Education (Class X)

Percentage: 86.3%
